Section A

1. Summarize the major duties to give a quick overview of the post's activities.

2. Duties and responsibilities

Each post is responsible for generally four or five major duties or functions. These duties should be presented in order of importance with a detailed explanation of how the duty is achieved. Miscellaneous tasks which take only a small percentage of time can be grouped and listed together. Terms such as "assists", "prepares", "handles", or "participates" describe relationships but do not actually describe what is done to assist, how something is prepared or handled, or how one participates; therefore, they should be accompanied by an explanation of the "what" and "how" of the actual duties.

Keep in mind the outputs or end products (what is produced or what the work leads up to). Present facts, not appraisals or evaluations of the work. The following examples from different posts illustrate explanations of how the work is accomplished.

4. Consequence of work

In general, decision making is considered as a commitment to a course of action that is not subject to detailed review. To make recommendations on the other hand requires the suggestion for courses of actions and implies that the post does not have complete or final responsibility. Decisions and recommendations made often relate to the choice from among guidelines, but they may also involve decisions or recommendations on what can be done to complete the work before referring to another source. Describe these kinds of choices made. In addition describe the damage that would be caused by errors in making these choices such as loss of time of incumbent, other staff members, or equipment; expenditure of excess funds; or additional work of others.

5. Work Relationships

Include only those contacts which are typical and occurring during the work cycle and indicate how contact is made (personal contact, telephone contact, correspondence).

6. Responsibility for the Work of Others

Be explicit in describing the nature of the responsibility. General terms like "supervise" are not sufficiently descriptive.
